PROFESSIONAL SUMMARY

Data Engineer / SQL Developer with 3+ years of experience in SQL development, ETL processes, backend data integrations, and analytics-ready dataset creation using SQL Server, T-SQL, and SSIS. Experienced in query optimization, data transformation, API data ingestion, and database performance tuning. Currently pursuing a Master's in Data Science and Artificial Intelligence while building expertise in scalable data pipelines and cloud-based data solutions.

PROFESSIONAL EXPERIENCE

Junior Software Engineer – Data Focused Role TECH 84

May 2024 – Present
Colombo

- Developed and optimized SQL Server databases, T-SQL queries, stored procedures, views, and functions to support business applications and reporting requirements.
- Designed and maintained ETL processes using SQL Server Integration Services (SSIS) to extract, transform, and load data from REST APIs and multiple source systems.
- Contributed to Data Warehouse solutions by developing analytics-ready datasets, supporting dimensional models, and preparing data for reporting and Business Intelligence initiatives.
- Applied database design best practices including normalization, indexing, query optimization, and performance tuning to ensure scalable and efficient database solutions.
- Collaborated with business stakeholders and Agile teams to gather requirements and deliver data-driven reporting and analytics solutions.

Software Developer - Intern Suntec Information Systems (pvt) Ltd.

June 2023 – May 2024
Moratuwa

- Designed and optimized SQL Server databases for transactional and reporting systems.
- Developed complex T-SQL queries, stored procedures, and views for analytics and operational reporting.
- Assisted in backend data integration and database performance troubleshooting.
- Performed query optimization, indexing, and execution plan analysis to improve SQL performance and reduce report execution times.

EDUCATION

Master of Science in Data Science and Artificial Intelligence University of Sri Jayewardenepura

2026 - Present
Expected 2028

Bachelor of Information Technology University of Colombo School of Computing

2025

DATA ENGINEERING PROJECTS (PERSONAL)

SFA Data Warehouse

GitHub: github.com/nadun-k-s/Sals_Force_ETL

- Built an end-to-end ETL pipeline for a Sales Force Automation (SFA) data warehouse.
- Implemented Staging → Dimension → Fact architecture, Star Schema, Incremental Loading, and SCD Type 2.
- Tech: SQL Server, SSIS, T-SQL

Retail Sales Data Platform

GitHub: github.com/nadun-k-s/Retail-Sales-Data-Platform

- Developed an event-driven ETL pipeline using AWS Lambda, Amazon S3, and Snowflake.
- Built RAW → STAGING → MART architecture with Star Schema, audit logging, and secure secrets management.
- Tech: AWS, Snowflake, Python, SQL, Docker

TECHNICAL SKILLS

Cloud & Data: AWS (Lambda, S3, ECR, Secrets Manager), Snowflake, ETL, Data Warehousing, Star Schema

Languages: Python, SQL/T-SQL, JavaScript, PHP

Databases: SQL Server, MySQL

ETL & Database: Stored Procedures, Incremental Loading, SCD Type 2, Query Optimization, ETL Audit Logging

Tools: Git/GitHub, REST APIs, SSMS
